1. The following is an examiner's statement of reasons for allowance:

In addition to the arguments presented in the Appeal Brief filed 07/13/2007, upon reconsideration of the prior art as a whole, the following remarks are presented by the examiner: The claims distinguish over the prior art of record whereby in the environment of the of a discharge device for delivering micro-ingredients to a feed ration having an inner tube and housing body terminating substantially co-terminous with one another of the type as recited in lines 17-27, the claims further require, a mounted storage bin with mounted auger, in delivery to a weigh hopper and scale in cooperation with the auger for delivery of the material to a pressurized air transport line with eductor for delivery into the inner tube of the discharge device.

The closest prior art is the Winn, Jr reference. A search of the prior art has found examples of the use of weigh hoppers, storage bins with augers, pneumatic eductor tube delivery devices in the feed of material as shown in the prior art references to Faussauer, Barlow and Briccardi. However, absent the use of hindsight, the prior art upon a consideration as a whole, a determination has been made that the prior art does not glean to any reason, or motivation, or problem in which a creative person of ordinary skill in the art would have looked to the types of supportive structural elements of Faussauer, Barlow and Briccardi in the formation of a combination as recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
